Labrador Solutions Announces Automated Meter Reads for Legacy (Non-Multimeter) OMD installations

KNOXVILLE, TN. - January 29, 2009 - Labrador Solutions LLC, announced the release of the latest version of their Labrador Print Fleet Management software today. The new version features the ability to input meter readings directly into the Legacy (Non-Multimeter) version of OMD.

"This new version allows us to completely automate the meter reading process from beginning to end for our customers who are using the Legacy versions of OMD. This was a need we identified that none of the other Print Fleet Management providers can do," said Gary McGill, a founding partner of Labrador Solutions and an OMD Consultant.
